

**11.6 Volume of Pyramids & Cones CYU**

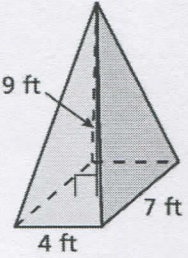

- Use when you get it right all by yourself
- S** Use when you did it all by yourself, but made a silly mistake
- H** Use when you could do it alone with a little help from teacher or peer
- G** Use when you completed the problem in a group
- X** Use when a question was attempted but wrong (get help)
- N** Use when a question was not even attempted

CONCEPTS	BASIC	INTERMEDIATE	ADVANCED
Volume of pyramids	1 - 3	4 - 6	
Volume of cones	15, 16		
Similar figures	7, 8	17, 18	
Volume of composite figures		9 - 11	12 - 13
Real World Application			14

Find the volume of the pyramids. Show your set up and work to get full credit. Don't forget appropriate units.

1.  **240 m<sup>3</sup>**

2.  **845 in<sup>3</sup>**

3.  **84 ft<sup>3</sup>**

Find the indicated measure. Show your set up and work to get full credit. Think about the appropriate units. Sketch a diagram for each problem.

4. A pyramid with a square base has a volume of 320 cubic centimeters and a height of 15 centimeters. Find the side length of the square base.

**$l = 8\text{ cm}$**

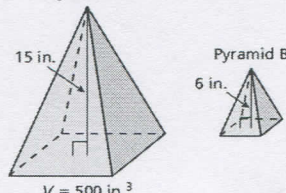

5. A pyramid with a rectangular base has a volume of 60 cubic feet and a height of 6 feet. The width of the rectangular base is 4 feet. Find the length of the rectangular base.

**$l = 7.5\text{ ft}$**

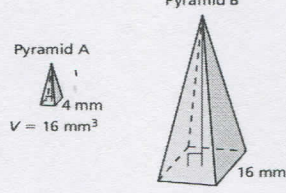

6. A pyramid with a triangular base has a volume of 80 cubic meters and a base area of 20 square meters. Find the height of the pyramid.

**$h = 12\text{ m}$**

The pyramids are similar. Find the volume of Pyramid B.

7. 

**32 in<sup>3</sup>**

8. 

**1024 mm<sup>3</sup>**

Find the volume of the composite solid.

$704 \text{ yd}^3$

$1155 \text{ m}^3$

$960 \text{ cm}^3$

$\approx 871.27 \text{ in}^3$

$47.24 \text{ cm}^3$

14. The Pyramid Arena in Memphis, Tennessee is about 98 meters tall and has a square base with a side length of about 180 meters. A prism-shaped building has the same square base as the Pyramid Arena. What is the height of the building if it has the same volume as the Pyramid Arena? (HINT: draw a diagram)

$\frac{98}{3} \text{ m} \approx 32.667 \text{ m}$

Find the volume of the cone. Show your set up and work to get full credit. Don't forget appropriate units.

$\approx 209.44 \text{ cm}^3$

$16.76 \text{ in}^3$

The cones are similar. Find the volume of Cone B.

$= \frac{512\pi}{3} \text{ mm}^3 \approx 536.165 \text{ mm}^3$

$= \frac{7\pi}{2} \text{ in}^3 \approx 10.996 \text{ in}^3$

**CYU Reflection:** How far can you go: basic, intermediate, or advanced?
