

7.5 Solving Rational Equations CYU Use when you get it right all by yourself**S** Use when you did it all by yourself, but made a silly mistake**H** Use when you could do it alone with a little help from teacher or peer**G** Use when you completed the problem in a group**X** Use when a question was attempted but wrong (get help)**N** Use when a question was not even attempted

CONCEPTS	BASIC	INTERMEDIATE	ADVANCED
State the LCD	1, 4	2	3, 5 - 8
Restrict the domain in interval notation	1, 4	2	3, 5 - 8
Solve rational equations	1, 4	2	3, 5 - 8
Check for extraneous solutions	1, 4	2	3, 5 - 8

State your LCD, restrict your domain, solve the equation, and check for extraneous solutions. All work must be shown to earn full credit.

1. $\frac{6}{x^2} - \frac{5}{x} = 1$

2. $\frac{2}{x+2} + \frac{2}{x-4} = 1$

3. $\frac{1}{x+3} + \frac{1}{x-3} = \frac{6}{x^2-9}$

4. $\frac{3}{5x} = \frac{2}{x-7}$

$$5. \frac{5}{x} + 2 = \frac{6}{x}$$

$$6. \frac{3}{x^2+x} + \frac{3}{x+1} = -\frac{1}{x}$$

$$7. \frac{2}{x-2} = \frac{x}{x-2} + \frac{6}{x^2+3x-10}$$

$$8. \frac{2}{x-3} - \frac{4}{x+3} = \frac{8}{x^2-9}$$

CYU Reflection: *How far can you go: basic, intermediate, or advanced?*

Rate your mastery level!

How confident are you with the skills this CYU covered? Circle the score you would give yourself.
