

**8.2 – 8.3 DAY TWO CYU**

Use when you get it right all by yourself

**S** Use when you did it all by yourself, but made a silly mistake

**H** Use when you could do it alone with a little help from teacher or peer

**G** Use when you completed the problem in a group

**X** Use when a question was attempted but wrong (get help)

**N** Use when a question was not even attempted

CONCEPTS	BASIC	INTERMEDIATE	ADVANCED
Error Analysis	1	3	2
Modeling with Mathematics		4	5, 10
Sketch and label triangles	6		9, 10
Determining if triangles are similar	6	8	7
Using similarity to solve for x/n		6	9
Writing similarity statements		8	7, 10
Determining scale factors			10

1. **ERROR ANALYSIS** Describe & correct the error in using the AA~ Theorem.

**X**

Quadrilateral  $ABCD \sim$  quadrilateral  $EFGH$  by the AA Similarity Theorem.

2. **ERROR ANALYSIS** Describe & correct the error in finding the value of x.

**X**

$$\frac{4}{6} = \frac{5}{x}$$

$$4x = 30$$

$$x = 7.5$$

3. **ERROR ANALYSIS** Describe & correct the error in writing a similarity statement.

**X**

$\triangle ABC \sim \triangle PQR$  by the SAS Similarity Theorem (Theorem 8.5).

4. **MODELING WITH MATHEMATICS** You can measure the width of the lake using a surveying technique, as shown in the diagram. Find the width of the lake, WX. Justify your answer with algebraic work.

5. **MODELING WITH MATHEMATICS** In the portion of the shuffleboard court shown,  $\frac{BC}{AC} = \frac{BD}{AE}$ .

- What additional information do you need to show that  $\triangle BCD \sim \triangle ACE$  using the SSS~ Thm?
- What additional information do you need to show that  $\triangle BCD \sim \triangle ACE$  using the SAS~ Thm?

6. Sketch the triangles using the given description. Then determine whether the two triangles can be similar. *The side lengths of  $\triangle ABC$  are 24,  $8x$ , & 48, and the side lengths of  $\triangle DEF$  are 15, 25, &  $6x$ .*

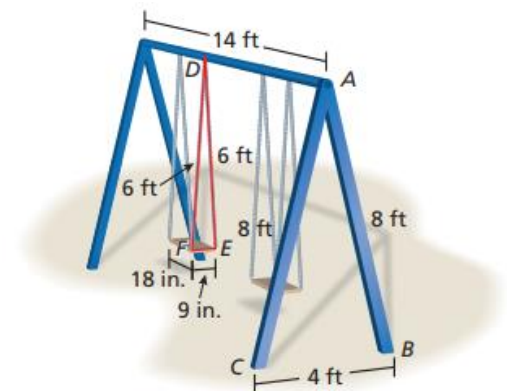

Show that the triangles are similar and write a similarity statement. Explain your reasoning with algebraic work.

7.

9. **MATHEMATICAL CONNECTIONS** Find the value of  $n$  that makes  $\triangle DEF \sim \triangle XYZ$  when  $DE = 4$ ,  $EF = 5$ ,  $XY = 4(n + 1)$ ,  $YZ = 7n - 1$ , and  $\angle E \cong \angle Y$ . Include a sketch.

10. **MODELING WITH MATHEMATICS** The dimensions of an actual swing set are shown. You want to create a scale model of the swing set for a dollhouse using similar triangles. Sketch a drawing of your swing set and label each side length. Write a similarity statement for each pair of similar triangles. State the scale factor you used to create the scale model.

**CYU Reflection:** How far can you go: basic, intermediate, or advanced?

**Rate your mastery level!**

How confident are you with the skills this CYU covered? Circle the
