

Name _____ Date _____ Pd _____

Chapter 5 Test Review Checklist

Go through this checklist and put “B” for before and “A” for after quizizz where you think you are for that concept.

- The left “smiley” face column means you feel ready 100% with that concept.
- The middle “hmmmm” face column means you are only okay with that concept sometimes.
- The right “crying” face column means you need way more support understanding that concept before the test.

Then complete the quizizz posted to Google Classroom. After you are done with quizizz, go through the checklist again, and mark “A’s”. This will help you know what problems out of the textbook chapter review you should focus on to raise your understanding before the test.

Concept			
Solution to a system of equations			
Graph a line			
Graph an inequality			
Shade a linear inequality			
Write a system for a word problem			
Solve a system by graphing			
Solve a system by substitution			
Solve a system by elimination			
Determine the number of solutions to a system of linear equations			
Determine if lines are parallel			
Determine if lines are coinciding			
Determine if lines intersect			
Check solutions to a system			
Graph linear system of inequalities			
Determine the solution(s) to a system of linear inequalities			
Dashed or solid line			
Check solutions to inequalities			
Write systems of linear inequalities			
Determine slope			
Determine the y-intercept			
Solve for a variable
